

MAYAR DEEB

Dubai, UAE • mayar.i.deeb@gmail.com • +971 568129757 • <https://www.linkedin.com/in/mayar-i-deeb/>

Senior Front-end Engineer with 6+ years of experience in web applications using **React, Vue, Next.js, Nuxt.js, etc...**
Eager to learn and stay updated with trends and best practices. Open-minded and collaborative in Problem-solving.

Experience

Nextgen Blockchain

Dubai, United Arab Emirates

Senior Front-end Developer

Jun 2024 – Present

- Maintain and develop multiple systems using **React and Vue**.
- Refactor and migrate the old codebase.
- Handle different deployment scenarios (white label) with **Azure SDK**.
- Communicate effectively with cross-cultural team, share ideas and feedback.

Alternativa

Dubai, United Arab Emirates

Senior Front-end Developer

Mar 2023 – Aug 2024

- Maintain and develop medical insurance apps using **React native, Next.js, Lerna**.
- Responsible for building and refactoring 120+ UI components that adapt to different platforms (web, mobile).
- Collaborated effectively with cross-cultural development teams
- Write **E2E, Unit** tests for extremely complex scenarios and components including the documentation.

Copax-FMS

Dubai, United Arab Emirates

Senior Front-end Developer

May 2021 – Aug 2023

- Develop a fleet management and tracking system using **React, Next.js** and Turbo repo.
- Integrate 8+ maps & self-hosted services enabling seamless functionality in all countries with strict dev roles.
- Diagnose and fix memory leaking in CSR & SSR, improving performance and stability.
- Collaborate with 12+ designers and developers, review PRs, and keep up with Ticking system.

Skills

React, Vue, Next.js (CSR, SSR, SSG, ISR, On-demand Revalidation, Proxy, SEO) & Nuxt.js (SWR, ISR, SSR, Pre-render)

CSS, JavaScript, Typescript, tRPC, Immer, Vuex, Pinia, Redux, Context API, Zustand, Rxjs, React-query, REST APIs, Gql, Socket.io, Firebase, Leaflet, **Figma**, Tailwind, MUI, Ant design, Cypress, Playwright, Jest, Storybook, Monorepo (Nx, Turborepo, Lerna), **NodeJS**, OpenAI API, **Azure**

Web3: solidity, opentelemetry, ethers.js, viem, chain-link/functions-toolkit, Oracles (VRF, Functions, Automation, and data-feeds), Remix, Hardhat (deployment, verification)

Projects

Medical insurance system (React-native, Next.js, SST, MongoDB, Lerna)

- Apollo GraphQL was used for API state, and Zustand for managing component state.
- Best practices were followed throughout development to ensure a maintainable and scalable application.
- Analytical data was collected to help us enhance UX, leading to 100% correct usage of design

Copax-FMS (React, Next.js, Nest.js, MongoDB, Turbo repo)

- Fleet management & tracking system, has complex forms, charts, and multiple maps integration,
- UI was created using MUI, we focused on standards, a modern color palette, font variants, and more.
- Unit tests were written, with Jest, to ensure the logic was intact during refactoring, e2e using Cypress.

iGaming white label (Vue, React, Nuxt.js, SQL, Solidity)

- wagmi + tanstack/vue-query was used for API state, Pinia for managing component state.
- focus on maintaining and refactoring old system + write unit and e2e tests.
- Improve pipeline speed by replacing bundlers, monorepo caching, split smart contract deployment.

Education

• **ASPU – University** Bachelor of Engineering, Computer Software Engineering

• **Amazon Web Services Cloud Practitioner**

Languages

- Arabic (Native or bilingual proficiency)
- English (Native or bilingual proficiency)
